

WRITE INSPIRED COURSE

This one day course takes teachers on an exciting, thought provoking and practical tour of Write Inspired. Delivered by its creator Philip Davis and using examples from his work all over the world you will gain a full understanding of this inspirational technique.

It is designed to motivate, inspire and engage all learners to love writing and self expression.

It is an immersive experiential technique that deconstructs the process of writing allowing children to discover their own ideas and give them a real purpose for expression.

The day consists of three main sessions

SESSION 1

THE CORE PRINCIPLES OF WRITE INSPIRED AND HOW THEY WORK

You will be taken through each principle with practical activities to demonstrate them.

Discover how to -
Deliver positive experiences that inspire
Create a dynamic learning space
Immerse people in a sonic environment
Value the individual response

You will gain an understanding of what these mean in the classroom and how to implement them

SESSION 2

WRITE INSPIRED IN ACTION

You will see and have a go at many activities to inspire writing. You will discover how powerful, inspirational and effective Write Inspired is.

SESSION 3

WRITE INSPIRED IN DEPTH

The third session looks at longer more complex activities which you will have a go at. We specifically look at the use of sound.

Sonic moulding - using sound to create 3D models to use as inspiration for poetry and story
Sonic story telling - how to enliven story creation with simple instruments
Immersive art - how to use visualisation of sounds to create poetry

By the end of the day you will be inspired to take on these techniques and apply them to your own teaching. To support the course there is a 100 page manual with downloadable content, a CD collection of specially designed sounds to use as well as free resources on the Write Inspired site.
